PROJECTS

Personal Portfolio Webpage

React, CSS3, Email JS, JavaScript | Personal Project · 2024 | View on GitHub

- Designed and developed a fully responsive, mobile-friendly portfolio using React with a component-based architecture.
- Implemented glassmorphism UI/UX with animated particle canvas background, floating blobs, and smooth scroll navigation.
- Integrated EmailJS for a fully functional contact form with real-time validation and status feedback.
- Built a typing animation hero section and intersection-observer based animated skill bars for enhanced UX.

.NET Full Stack CRUD Application

ASP.NET Core, C#, SQL Server, Entity Framework, Bootstrap | Personal Project · 2024 | View on GitHub

- Built a full-stack web application with ASP.NET Core MVC implementing CRUD operations on a SQL Server database.
- Developed RESTful Web API endpoints with Entity Framework Core for ORM-based data access.
- Designed responsive front-end using Bootstrap and integrated form validation with JavaScript.
- Applied OOP principles and MVC architecture to maintain clean separation of concerns.
